

microFleet

micromobility united

The promise of micromobility (MM)

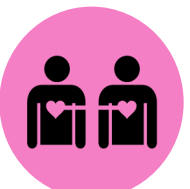

Reduces traffic congestion and emissions

Cuts travel time and cost

100 x less energy and charging power, so no grid upgrades

Improves health and social connection

United we ride
Divided we stall

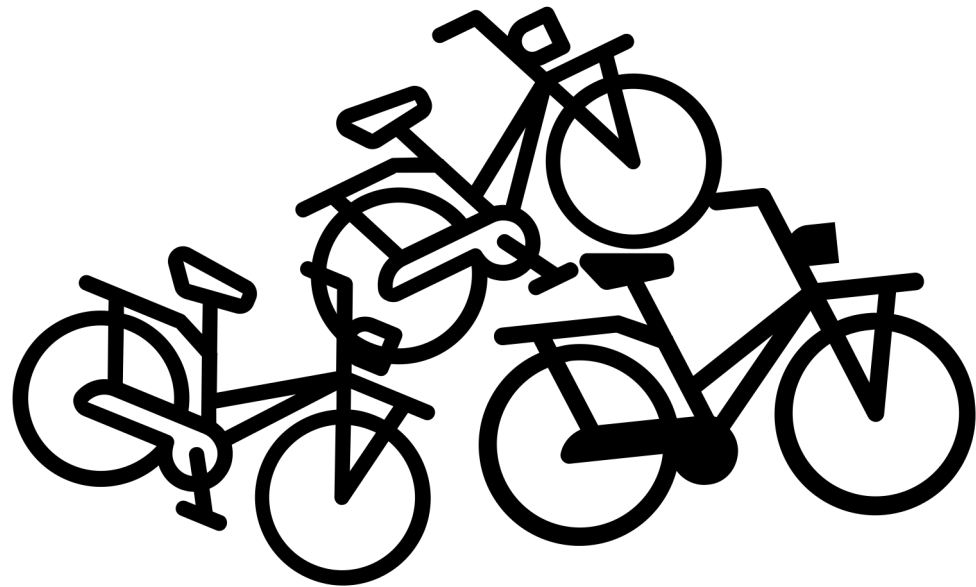

Micromobility (MM) is divided

No universal charging

Micromobility (MM) is divided

No universal parking

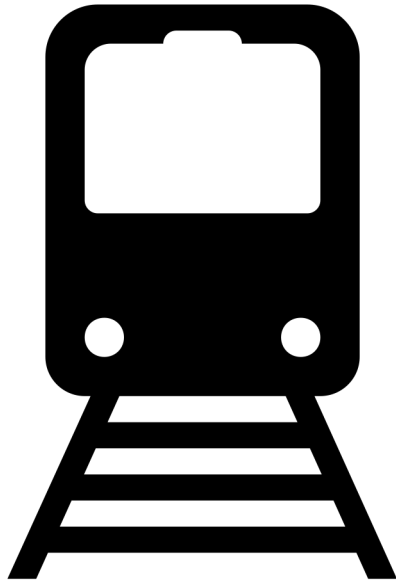

Micromobility (MM) is divided

No universal connectivity

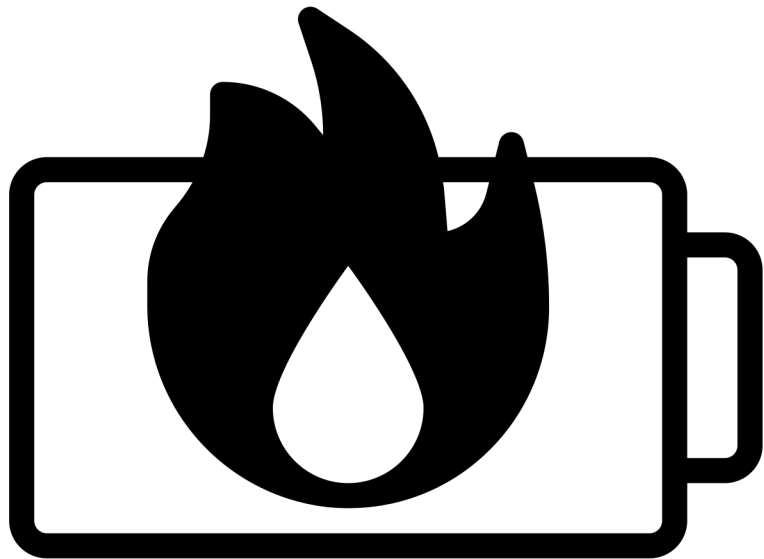

Micromobility (MM) is divided

No public transport integration

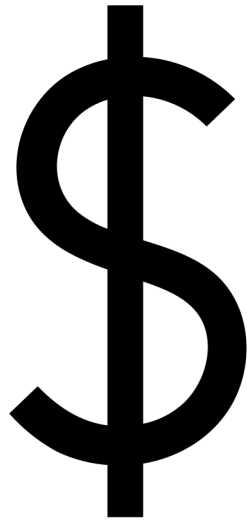

Micromobility (MM) is divided

Unsafe private charging

Micromobility (MM) is divided

High operating costs
